ENTERPRISE MODULES

Comprehensive Operations Architecture

AI Table Booking Engine

Dynamic floor map optimization, automated SMS guest confirmations, and turn-time predictors for high-density dining rooms.

Predictive Inventory Costing

Real-time wastage calculation, ingredient batch tracking, and automatic purchase order placement with preferred suppliers.

DineIn AI
ENTERPRISE OS

Geofenced Staff Roster

GPS validated shift clock-ins, labor law compliance tracking, and automated shift swapping for kitchen & front-of-house staff.

Omnichannel POS Sync

Seamless real-time order dispatch to kitchen displays, table bill splitting, and enterprise PMS hotel room charge postings.

Kitchen Display (KDS)

Real-time prep timer counters, station routing, and ticket priority queueing for chef staff.

Executive AI Copilot

Ask complex operational questions in plain language and receive real-time business optimization recommendations.
